

Love Your New Tree!

Here's how to take care of your tree and protect your warranty after we plant it and you take over.

Watering: Step Number 1

There are many variables that enter into this picture - soil type, temperature, light, wind and rain.

Check your watering if you notice wilting, folding or cupping of leaves, or subtle color change.

FEEL YOUR SOIL! **Wilting and color change can be sign of too much water as well.**

If it is dry - soak it. If it is wet - let it dry out before watering again.

Each tree in your yard may have different watering requirements.

Make sure you know if you have a water loving tree or a drought tolerant tree before you adjust watering.

GENERAL Watering Instructions: (YOU MUST ADJUST THIS FOR YOUR SPECIFIC CONDITIONS/TREE TYPE)

1/4" width flow (this will take 160 seconds to fill a 1 gallon container.)

Tree Size	January to April	May	June to September	October - November	December
30 Gallon	20 Gallons 1X per week	20 Gallons 2X per week	20 Gallons 3X per week	10 Gallons 2X per week	20 Gallons 2X per month
45 Gallon	25 Gallons 1X per week	25 Gallons 2X per week	25 Gallons 3X per week	20 Gallons 2X per week	25 Gallons 2X per month
65 Gallon	35 Gallons 1X per week	35 Gallons 2X per week	30 Gallons 3X per week	35 Gallons 2X per week	35 Gallons 2X per month
95 Gallon	45 Gallons 1X per week	45 Gallons 2X per week	45 Gallons 3X per week	45 Gallons 2X per week	45 Gallons 2X per month

Your lawn sprinkler system was not designed to properly water larger trees unless you have installed tree bubblers.

Tree Bags are an excellent addition to your water program for your newly planted trees. Ask your **Fossil Creek Tree Farm & Nursery** professional for more information and product availability. **Tree Bags** provide up to 20 gallons of water while allowing a constant slow-release water flow for up to nine hours. Perfect for clay soil!

Root Stimulator & Starter Solution is an aid to the development of a fast root structure, strong root structure and green vigorous trees. It contains a rooting hormone and fertilizer. Follow application instructions as provided by the product manufacturer.

Protecting Your Warranty! In the event that your new tree begins to struggle and show signs of wilt, fading leaves or dropped leaves, contact **Fossil Creek Tree Farm & Nursery** immediately. We will do everything possible to identify the problem and offer corrective care suggestions. Please call, come by, email photographs and share with us the symptoms your tree is experiencing. Failure to contact us in a timely manner may void your warranty.
